PROFESSIONAL SUMMARY

Full Stack Developer with nearly 5 years of experience building scalable web and mobile applications using modern frontend and backend technologies. Adept at leveraging AI-powered tools (Claude, Gemini, Codex, GitHub Copilot) to accelerate development, enhance code quality, and optimize workflows. Strong communicator and collaborator with a proven track record of mentoring teams, leading end-to-end feature deployment, and aligning technical solutions with client needs.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** React, React Native, Next.js, Angular, Remix, Electron, HTML/CSS, SCSS/Sass, Tailwind, Material UI, Ant Design, Webpack, Vite
- **Backend:** Node.js, Express.js, NestJS
- **Databases & ORMs:** PostgreSQL, MySQL, MongoDB, TypeORM, Sequelize, Prisma
- **Tools & DevOps:** AWS, Docker, Git, GitHub, BitBucket, CI/CD Pipeline, Jira, ClickUp, Figma, Adobe XD

PROFESSIONAL EXPERIENCE

Software Engineer | BCDApps (Remote, Islamabad)

Jan 2023 - Apr 2026

- Led end-to-end development of 50+ web and mobile features, from technical planning and implementation to deployment, while ensuring alignment with business requirements.
- Mentored 2 junior developers through code reviews, technical guidance, and best-practice adoption, improving consistency and maintainability across the codebase.
- Reduced development time by 60% by leveraging AI-assisted tools such as Claude, Codex, and Gemini for code generation, refactoring, debugging, and automated test development.

Junior Mobile Developer | Abtach (Onsite, Karachi)

Dec 2021 - Dec 2022

- Built and launched 10+ responsive mobile application features in close collaboration with UI/UX designers, elevating user engagement and interface usability by 20%.
- Integrated 15+ RESTful APIs with backend microservices, optimizing data fetching routines and reducing app load times by 30%.
- Identified and resolved 50+ critical bugs and memory leaks, decreasing application crash rates by 40% and significantly improving system stability.

Software Engineer Intern | Sky Electric (Remote, Islamabad)

Nov 2020 - Feb 2021

- Resolved 10+ software defect tickets across core application modules, achieving a 15% reduction in pre-release bugs by collaborating with senior engineers on debugging and testing protocols.
- Delivered 8+ user stories on time with a 100% sprint completion rate by engaging in bi-weekly Agile workflows, technical communications, and core SDLC practices.

PROJECTS

HelloAya: Developed a flexible apartment rental platform that facilitates furnished living accommodations. Users can discover available apartments, explore property details, and find suitable rental options based on their accommodation needs.

HeyPlanner: Built a comprehensive task and planning application designed to organize and streamline user schedules. Users can create, manage, and track tasks and activities, helping them stay organized and efficiently plan their daily routines.

RunOfShow: Created a dynamic event workflow platform designed to centralize and manage complex production tasks. The application helps event teams organize workflows, coordinate activities, and manage production-related information from a centralized platform.

Minglee: Developed a social networking platform, enabling users to connect and discover people. Users can create and share posts, interact with content through reactions, and engage with others based on their common interests.

StuntListing: Delivered a specialized networking platform connecting professional stunt performers with industry production teams. Users can create professional profiles, discover relevant opportunities, and connect with production teams for potential projects and collaborations.

Bandit Booking: Developed an artist booking platform that enables users to discover and book singers and artists for events. Users can explore artist profiles, review available information, and connect with suitable performers based on their event requirements.

GigoShift: Developed a freelance task marketplace where clients can post tasks and freelancers can discover, apply for, and manage opportunities based on their skills. The platform streamlines the process of connecting clients with suitable freelancers and managing task-related opportunities.

EDUCATION

Bachelor of Software Engineering | Indus University, Karachi

Jul 2015 - Apr 2019

CERTIFICATIONS

- Meta Front-End Developer Specialization – Coursera – [Certificate](#)
- AWS Fundamentals: Going Cloud-Native – Coursera – [Certificate](#)
- Introduction to Programming Using Python – Microsoft – [Certificate](#)
- PIAIC – Artificial Intelligence – Panacloud – [Certificate](#)
- Introduction to TensorFlow for AI, ML, and DL – Coursera – [Certificate](#)
- Python for Data Science, AI & Development – Coursera – [Certificate](#)
- AI for Everyone – Coursera – [Certificate](#)
- Getting Started with AWS Machine Learning – Coursera – [Certificate](#)
